

Shikhar Bhatt

Senior Software Engineer

+91 7208389809 · shikhar.bhatt011@gmail.com · Pune, India · [LinkedIn](#) · [GitHub](#) · [Portfolio](#)

Software Engineer with 6.5+ years architecting end-to-end web applications — scalable Node.js/NestJS backends, React frontends, and cloud infrastructure on AWS and Azure. Proven track record of driving technical decisions, reducing costs, and shipping reliable systems at scale. Open-source contributor and published researcher. Currently pursuing MS CS (OMSCS) at Georgia Tech.

EXPERIENCE

Senior Software Engineer

Jul 2023 – Present

Impactility Pvt. Ltd. · Pune, India

- Architected the full stack for Hitachi's Corporate Sustainability Reporting Tool — NestJS backend with Redis caching, RESTful APIs, and an AI-powered data chatbot using LangChain, integrated with a React frontend serving enterprise clients.
- Designed and delivered a supply chain traceability platform with Digital Product Passports (DPP), building end-to-end backend services, data models, and frontend dashboards for enterprise customers.
- Contributed backend API design to the [OpenWallet Foundation's VC-API](#) open-source project in a globally distributed engineering org.

Software Engineer

Mar 2022 – Jun 2023

Impactility GmbH · Berlin, Germany

- Reduced service latency by 40% by provisioning dedicated private RPC infrastructure, eliminating third-party API bottlenecks.
- Authored and open-sourced a [TypeScript Azure Key Vault library](#) for secure hardware-backed signing in backend services — adopted in production.
- Built and shipped a full stack application end-to-end — Node.js backend, React frontend — demonstrating full product lifecycle ownership.

Software Engineer

Aug 2021 – Feb 2022

Impactility Pvt. Ltd. · Pune, India

- Designed and maintained REST microservices in Node.js with high availability and horizontal scalability across distributed environments.
- Built a reusable React.js component library adopted across multiple product surfaces, improving UI consistency and reducing dev time.
- Automated AWS resource monitoring using Lambda and EventBridge, achieving a 30% reduction in operational cloud costs.

Application Engineer

Aug 2020 – Aug 2021

Schlumberger Ltd. · Pune, India

- Developed REST APIs and Azure Functions for a .NET Core enterprise app using Microsoft Workflow Foundation for business process orchestration.
- Automated Azure IaaS and PaaS provisioning with Terraform, cutting infrastructure setup time by 80%.

Associate Application Engineer

Jul 2019 – Aug 2020

Schlumberger Ltd. · Pune, India

- Engineered an automated VM de-allocation system across Azure and GCP, achieving a 65% reduction in cloud billing.
- Built Python automation for VM right-sizing via Turbonomic and ServiceNow, cutting provisioning time by 95%.

SKILLS

Languages

TypeScript, JavaScript, Python, Go, C#

Backend

Node.js, NestJS, .NET Core, REST APIs, Microservices, GraphQL, LangChain, Kafka

Frontend

React, Redux, CSS, Responsive UI, Component Libraries

Databases

PostgreSQL, MongoDB, MySQL, Redis

Cloud & DevOps

AWS, Microsoft Azure, Docker, GitHub Actions

Testing

Jest, Mocha, Chai

Other

System Design, Open Source, Agile/Scrum

EDUCATION

MS, Computer Science (OMSCS)

Georgia Institute of Technology

Aug 2024 – Dec 2026 · GPA: 3.6 / 4.0

In Progress · Online

BE, Information Technology

University of Pune

Aug 2015 – Jun 2019 · GPA: 9.23 / 10

COMMUNITY

MIT Computer Users' Group

Instructor — open-source, Linux, Git, Shell scripting sessions for university students.

NOTABLE PROJECTS

LifeBlocks — Distributed Insurance & Health Records Platform [View →](#)

- Full stack platform — Node.js backend, React frontend, IPFS document storage — for managing medical histories and insurance policies.
- Published:** ["Lifeblocks: A Blockchain based Insurance Platform"](#) — DCNET 2020 Conference.
- Won TCS-sponsored Best Student Project Award 2018–19.
